

# THE RED HEN PROJECT

**IMPORTANT:** If you or someone you live with has had Covid symptoms (high temp, new continuous cough, loss of taste or smell) within the last 14 days before a Red Hen Family worker visit then we will be unable to visit in person. However, we are happy to chat on the phone or online, with or without video.

## Visits to your home

Red Hen Family workers will be following Covid-safe guidelines and **we will not come and see you if we, or anyone in our household, has any symptoms.**

We will check our temperature before a visit and ensure we have sanitised our hands.

- 🔴 If we can sit in the **garden** and the weather is nice enough - this is the best option
- 🔴 We can also visit you inside your home but please check that we are able to sit **2 metres apart** and arrange some chairs before we come and see you so that this is possible. We will always carry a mask with us and are happy to wear one if you would prefer – we will ask you when we visit. Please leave **windows open.**
- 🔴 We do not expect you to wear a mask as we will be maintaining a safe distance, but if you feel safer please feel free to do so.
- 🔴 If we can't socially distance in your home or use a garden then we can meet you in a community venue that is walking distance from your home.

## Visits with children

- 🔴 If you feel that keeping a social distance will be a challenge for your child/ren, please chat to us before the visit and we can decide on the best place to meet or how we can best manage this together to keep everyone Covid-safe.

## Things to remember before and during a home visit:

- Check if you have any **symptoms**
- Remain **2m** apart
- Wash hands and/or **hand sanitise** before and after a visit
- Keep **windows open** in the home during a visit
- Wear a **mask**, and/or ask us to if you feel more comfortable

**Please chat to us about anything you are concerned about – we can also speak to you on the phone or via video link if you would prefer.**
